DON'T FORGET THE CLUB MEETING ON AUG. 5th. Plans are being made for the picnic to be held on the 8th of Sept. at Doyle Park. There will be a talk in on the repeater in case you get lost. You should be receiving a post card about it. POT-POURRI...Sonoma county was well represented at the Reno Convention...K6ANP, Len, really enjoyed the machines...Len and his family are vacationing in the south... Just in...WD6CKP, Hoppy, has been getting performance reports on the repeater... We suggest that they go to a number system, rather than the "I'm sorry about last nite". Vern, K6CNJ has moved his tower to his new QTH...David WD6AJR, has moved to a new location also... I guess the comute got to him... Terry, WA6RNF, and Judy have returned from their trip north...Paul, AE6H, has recovered from his sprained ankle and will be ready for the picnic.

Overheard on the repeater: Hoppy, WD6CKP, explained for all interested parties the difference between male and female connectors. We wont go into details but N6AUP was enlightened and is no longer in the dark....Hoppy is now playing with a new 2 Mtr. amplifier. Now, when he puts his foot in his mouth it can be done with more power...Rose had another Birthday but refused to tell ACA how many it made. She thought those big numbers would just confuse him...Also, Rosereported she "had a thing going with Betty". It was news to Hoppy! Guess that's why she refused to "carry on with Ron".

N6BLN has a new beam and tower up. He was transmitting with it before it left the ground. Sorry Lyle, no award for patience this month!

Several local Hams attended the Reno Convention. WB6NBR said he behaved himself but K6CNJ reported that Ron was his normal self. We don't know which one to believe.

Our fearless leader, KB6LO, had a recent visitor ...DJ5VV.

The last SCARS Meeting was a lively one with W6SVC, Chief Radio Officer of Races as guest speaker....No further comment at this time.

Sears' best TV Technician, Rudy, WA6QMP has transferred to Crescent City. They'll just have to limp along with NBR botching things up!

FOR SALE

Yaesu FT101EE, Phone patch, monitor scope, external VFO and speaker, digital readout, in a console with boom mike and foot switch. Contact George Shedore, N6AUP...528-0201

DL NEWS

Our sister club in Lubeck, Germany has asked us to participate in their Club exhibit on Sept. 8. Hans, DJ6TJ has sent us the following sked and hopes to work many operators in Santa Rosa. They will be using the call DL0LK. We hope to see you all on the band on that day. Sked is as follows:
Saturday and Sunday from 1500 GMT to 1800GMT. Every hour in the following way.....

h plus 00	21.075	cw
h plus 10	14,075	cw
h plus 20	28.175	cw
h plus 30	21.400	ssb (-qrm)
h plus 40	14.3475	ssb(-qrm)

We will have his letter at the club meeting so everyone will have a chance to read it. This will be the first opportunity for our club to join with our sister club on the air and also to collect a few QSL cards that have special meaning. Warm up that rig and be ready.

By the way, don't forget the picnic at Doyle park in the afternoon.....

See you at the meeting.....

4. Tarry thou not amongst those fools that engage in intentional shocks for they are surely non-believers and are not long for this world.

5. Take care thou useth the proper method when thou taketh the measure of a high voltage circuit so that thou dost not incinerate both thee and thy simpson, for verily thou hast no plant account number and can easily be replaced thy simpson doth have one and as a consequence bringeth much woe unto thee..

To be continued.....

Buy Sell Trade. ~~Give~~ away etc..etc.....

As the summer flies by, Amateur activity in Sonoma county continues to provide plenty of activity.

At this writing,, Novice classes are starting at the Adult Education Center in Santa Rosa. They will begin at 7:00 p.m. on Wed. and Monday eves. First classes will start on Sept. 10 and Sept. 12. Instructors will be WD6AJR, Dave,, KB6LO, Don; with assist from N6BLN, Lyle, WA7UVE, Scott, WB6NBR, Ron and several others lending a hand at various times. We still have room for a few more students, so spread the word.

Classes are also being organized in Windsor, Sebastapol and Valley of the Moon.

If you have your old "Tune In The World" textbooks, we would like to borrow it until our order arrives. Supplies are short in the Bay area.

#####

We are ordering new membership cards and they will be issued as soon as they are ready.

#####

It has been suggested that we have more social functions and a breakfast was recommended. Is there any member that would assume the responsibility of organizing such an event? We have many volunteers to help but ~~XXX~~ it seems no one wants the responsibility. How about it, Do we have anyone with club spirit and courage? ? ? ?

The same thing applies to our technical workshops. many are interested, but we need leaders. C'mon gang, get involved. It costs you nothing but a little well spent time and you just might enjoy it.

Ideas are still needed for the club emblem and we will be taking a vote on them at the next meeting. Patches will be ordered next month and your idea just might be the lucky one. Get out your colored pencils and get going.

KEEP READING *****KEEP READING

Another big event scheduled for Sept. 23, is A mini ham-fest sponsored by KB6LO, Don at his house. Don is having an amateur radio yard sale and has asked the club to participate. He will provide tables to rent at \$2.00 with the money going to the club. We could have a raffle and refreshments and a good time. So clean out your shack, make a couple of dollars for yourself and the club. Don has pledged 10% of his sales to the club treasury. How can we lose?? Advance reservations for the tables is requested so that we can have enough of them available. Call Don at 546-7047. Don't forget, Sept. 23 and spread the word.....

Speaking of used junk and gear, we can always use miscellaneous items for our raffle. Bring them along to the meeting. Surplus magazines are always in demand as are transformers, meters books, etc.

Start designing your direction finder antenna for the October transmitter hunt. Frequency will again be 146.52. These hunts are lots of fun and we hope to have lots of participation.

HAM SHACK SAFETY

The following rules were taken from Feb. 1966 RTTY journal. We are printing the first five with the rest to follow next month.

- TEN COMMANDMENTS OF AN ELECTRICAL ENGINEER
1. Beware the lightning that lurketh in an un-discharged capacitor lest it caus thee to bounce upon thy buttocks in a most ungentlemanly like manner.
 2. Cause thou the switch that supplieth large quantities of juice to be opened and thusly tagged that thy days may be long in this earthly vale of tears.
 3. Prove tã thyself that all circuits that rãlateth and upon which thou work are grounded thusly tagged lest they lift thee to radio frequency potential and cause thee to make if glow lamp.

... has been asked to sponsor a Boy Scout Amateur Radio Explorer Post. We should be proud to have this opportunity. There is no obligation to the club, but we hope our members will lend the physical support when needed. These Scouts are 14 to 18 years old and we can expect a new group of first class radio amateurs along with a great deal of goodwill and publicity. Let's all get behind this effort. Further info can be had by contacting N6BLN, Lyle. He will also answer any questions at the next meeting.
#####

We would like to set up a couple of ~~XXXXX~~ Window displays in Santa Rosa and ideas are welcome. These will not require people to be present during the display, but assistance would be appreciated. Got any posters, Gear, pictures, etc? We can use them.....
#####

on, KB6LO reports that two people passed their voice exams last week and are waiting for their tickets. They are Hans Sorensen, Sebastapol and Tom Kikuchi, Windsor. Congratulations!!!!
#####

now have the materials to construct a 8 ft. 12 ft portable communications center. If you would like to help with the construction, we can get it completed quickly. This could be a real point for some enjoyable get togethers at the same time make progress for the club. We can make this a mobile rig as soon as we have a chassis.

More More More
wish to welcome N6AUP, George, to the board of officers. George will replace a very busy O, Jim Hanlon, who asked to be replaced due to his heavy schedule. We are happy to have George on our side. His interest in Ham Radio and dedication th the club will benefit us all. We hope to have you with us George.....
