ARE YOU NOT AN SCRA MEMBER?

IF SO, then this is a complimentary copy. Our club is involved with almost every area of Amateur Radio: Repeaters (13/73), Field Day, license classes (Novice through Extra), volunteer exams, RACES, DX programs, packet (145.03), hidden xmtr hunts -- you name it.

We invite you to attend our next monthly meeting (see below) or check into the Tuesday night SCARS net on the 146.13/73 repeater at 7:00 PM. You will hear the latest Westlink Amateur Radio News broadcast, announcements of SCRA activities, and a Swap Shop. If you would like to join SCRA, please refer to the dues listed below. Hope to have an "eyeball" QSO with you at the next meeting! 73 ...

CLUB MEETINGS:

7:30 PM, 1st Wednesday each month at the EOC (Emergency Operations Center, see map below)
 All are welcome to attend.

NEXT MEETING: June 7, 1989

PROGRAM: **FIELD DAY!**

DUES: \$12 per year, plus a one-time \$4.00 initiation fee. Dues are pro-rated \$1/month for new members. With membership, comes an SCRA call/name badge. Family membership: \$18

ALL ABOUT ELECTRICITY

By Joe Strolin K1REC via *The QRA News*

I have been fiddlin' with electricity for 50 years! While I'm still able, I'd like to pass along some of my vast knowledge about this stuff.

1. Electricity is manufactured in power plants where it is fed into wires and wrapped around large drums that hang on poles.
2. Some electricity does not need to go through wires, like that used for lightning, for example, and portable radios. This kind of electricity is not manufactured, but just hangs around in the air, loose.
3. Electricity makes a low humming noise. This noise may be pitched differently for use in telephones, doorbells and electric organs.
4. Electricity must be grounded before it can function -- except in airplanes, which have their own arrangements.
5. Although electricity does not leak out of an empty socket, if you put your finger in the socket, you can tell it's there. So if it is not leaking out, what else is it doing?
6. Electricity is made of two ingredients, negative and positive. One ingredient travels along a wire covered with white plastic, the other ingredient along a wire covered with black plastic. These two wires connect to a device called a plug. There the two ingredients are mixed to form electricity.
7. Electricity may be stored in boxes, called batteries. Big batteries do not necessarily hold more electricity than small ones. In big batteries, the electricity is shoveled in, while in small batteries, it is packed in flat.
8. The electric switch contains a sort of vise grip that squeezes the wire very hard so the electricity can't get through. Opening (turning "on") the switch releases the vise grip, and the electricity can flow.

9. Electricity goes into a light bulb where for the first time we can see it! It is enlarged many times by the curvature of the bulb, which is made of magnifying glass.
10. Why does the light bulb blow out? 'Cause as any schoolboy knows, heat converts oxygen into moisture. When all the oxygen in the bulb becomes moisture, then the water quenches the spark.
11. Colored electricity lights red and green bulbs and stoplights.
12. Negative electricity runs refrigerators.
13. Some people who don't understand electricity wire their fuseboxes to hold little glass things with fuse wire in them. K find chicken wire better, and it won't blow out, even if the dryer goes up in flames.

Despite all this vast knowledge, I still don't understand a few things about electricity, like how a computer that speaks English can be programmed to speak French, which is a different voltage? Also neon signs are a mystery. How is the electricity trained to spell out things? How does the electricity know when the toast is ready?

P.S. Most of what I have learned was from *Readers' Digest*. Tnx Worldradio News.

1000 BIKES, 160 MILES AND 15 HAMS

Although outnumbered 60-to-1, our "thin blue line" of Radio Amateurs helped shepherd an army of bicyclists over 160 miles of Sonoma County countryside on Saturday, May 13. The morning route ran from the Luther Burbank Center north to Geyserville and back, a distance of 100 km. After lunch, the more ambitious riders attacked the hilly 100-mile afternoon circuit which ran west through Graton, Occidental, Monte Rio, Guerneville and back to the Burbank Center.

This is one of our longest public service events: we had people on duty from 6 AM to 6 PM. With a course this big, communications is essential. Operators were needed at the Burbank Center, the two field stations in Geyserville and Monte Rio, and on each of the "sag wagons". In all, 15 hams helped out: Al N1AL, Philip KC6BSI, Hoppy WD6CKP, Bob WB6EKV, Connie N6FYV, Ken N6GXI, Georgia N6GZU, Russ N6KMJ, Steve WA8LLY, Ren KI6LS, Ken N6MHG, Phil N6OOA, Bob N6RMW, John W6TLK, and Jack N6UYB.

5 NEW HAMS

Tracy WB6TMY reports that of the 12 or so who took his Novice class, 4 have already passed their test (plus one who wasn't in the class). The next class will be this winter, probably after Jan 1. Tracy is looking for a better QTH for classes than the EOC (getting the key has been a hassle), so if you have any ideas, give him a call. (See page 2 for phone nr.)

ELMER

TNX ARNS

The big topic for the upcoming June 6, 1979 meeting was to be Field Day. The club used "the same site as in previous years" (Ragle Park in Sebastopol?). Ron WB6NBR and Terry WA6RNF were the co-chairmen.

Volunteers were needed for the booth at the Sonoma County Fair, especially traffic handlers. Someone suggested SCRA members should have some form of ID when we participate in public functions, perhaps cloth patches.

FLEA MARKET NEWS

Chod WB2CHO will be Chairman of the SCRA Flea Market this year, September 16, 1989. If you would like to help out, give Chod a call at 526-2198.

WANTED: FOR VIP COMM. VAN

We are looking for several small hi-intensity desk lamps made by "Tensor" model 7200. These have a short gooseneck and use a 12 VDC bulb. If you have one you could donate or will sell, please contact:

Garry N6ONZ at 584-342573

File: Lyle. Do you know him?

First licensed in 1921 with 6ASL call.

A member of SCRA since 1977.

Holder of Extra Class license since 1959.

ARRL member since 1939.

Resident of Forestville and married 56 years to an angel named Madeline.

An avid CW DX hound and a QCWA member.

Former Pres. of Local #16 - Int'l Alliance of Theatrical Employees. Retired 1973.

You can usually find him pounding brass on 21.010 MHz almost every day until 6 PM in spite of a handicap. He will give you a cheery "hello" on 146.73 MHz should you give him a shout.

WHO? Lyle Anderson K6MZ.

Tnx Bill K6TCD.

To: Editor, Short Skip

Alan, Please change the mailing address for the Far West Repeater Assoc. to PO Box 3381, Eureka, CA 95502.

We really appreciate getting Short Skip up here in Humboldt County.

Whenever any of your members are travelling in our area, they are welcome to use 146.76 or 146.70 if they need a phone patch.

73's Paul Hoff KA6SFX, Secretary/Treasurer

DON'T BE SHY!

As a regular feature of Short Skip, we would like to include brief sketches of selected members of the club. There are as many stories in the club as there are members, and each one makes interesting reading. It also gives the club members a greater depth of insight into the not too-private parts of their fellow members' lives.

YOU have been selected for an article, and we would like you to respond to the following questions so that we may give the club members a brief glimpse of you.

SCRA MINUTES

MAY 3, 1989

In the absence of our President (due to a bad back), the meeting was called to order by Vice President John Wallack W6TLK at 7:37 PM. Other Officers present: Secretary Al Bloom N1AL, Treasurer Jim Pelmulder N6PTM, and Members-at-Large Bob Olsten WD6DPE and Chuck Sabin N6DDK.

Jane N6NTB introduced one VISITOR: Zanes Epps of Windsor.

NEW CALL since last time: KC6CAJ now N6UXI.

The MINUTES of the last meeting were approved as printed in Short Skip. m/s N600A/WD6CKP

The TREASURER'S REPORT by N6PTM shows \$1510.33 in the General Fund and \$1981.65 in the Repeater Fund. Approved m/s N6FAX/WA6ACX

FIELD DAY: We still need a Chairman! N1AL reports we do have the Two Rock Coast Guard Training Center confirmed.

W6DTV wants to know if we are going to put the new AUTOSLOT NUMBERS in Short Skip. We've done it in the past, although some may not want their phone numbers published, and many slots are not the member's home phone.

CORRESPONDENCE: N1AL has a letter from a prospective ham in Petaluma -- It turns out he is already hooked up with our Novice class. Al also offered flyers for the upcoming Sacramento swap meet.

N6PTM has BADGES for new members.

The DMV won't register silent key WB6RHP's TOWER TRAILER as a special purpose vehicle so K6GEV suggests we have the current owners "down south" try their local DMV office.

The PROGRAM for tonight was the ARRL's Field Day video.

Thanks to HSC Electronics, Farmer's Lane Radio Shack and ARRL for the RAFFLE PRIZES.

Don't tell Katie that N1AL walked away with a stripper.

VOLUNTEERS to chair the Flea Market and Field Day are still needed. W6TLK and N1AL will be twisting arms.

The MEMBER LOTTERY resembled a Panamanian election this evening, with Lottery Chairman K6GEV winning the prize.

Meeting adjourned 8:49 PM. m/s K6GEV/WD6CKP

PACKET POINTERS

by Stan KH6GBX and Les WA6EQQ

1. THOU SHALT NOT BEACON.

Discussion: Beacons clutter the air and can unnecessarily impede communications for others. In the early days of packet, beaoning was like calling CQ. Packet radio has grown faster than any other mode in ham radio and beaoning where packet is established is not welcomed.

2. LIMIT THE LENGTH OF EVERY LINE TO 65 CHARACTERS (COLUMNS).

Discussion: The most common mistake of new packeteers is to forget that the ENTER key is required at the end of every line. Your computer may appear to do this automatically but it won't on packet radio. You must use the ENTER key just like a carriage return on a typewriter or a Teletype. Nothing is more frustrating than to read a line that looks like this!

3. PLEASE DON'T DO KEYBOARD TO KEYBOARD QSO'S ON BULLETIN BOARD (BBS) CHANNELS.

[By the same token, don't put a BBS on a keyboard channel, either - Ed.]

Discussion: The primary advantage and purpose of packet radio is to move messages in the shortest amount of time. This is why we write them first to disc, edit them if necessary, and then transmit them in the shortest possible time so that others may use the channel.

4. IF YOU HAVE MORE THAN ONE BBS IN YOUR COMMUNITY, USE ONLY ONE. (Linked BBS, as opposed to PBBS, private mailboxes.)

Discussion: Most BBS's carry the same bulletins or "To ALL" messages. Therefore, browsing different BBS's needlessly clutters the packet channels. It will confuse others who want to send you messages. Let them know at what one BBS callsign you receive your "mail".

5. IF YOU USE A BBS, CHECK IT DAILY FOR YOUR MAIL.

Discussion: Using a BBS is like having a pager. When you have a pager people know they can reach you that way. It's the same with a BBS. You wouldn't let the mail pile up in your mailbox at home -- or in a BBS.

Tnx KB6GOZ BBS

ANY LEW MCCOY'S OUT THERE?

Now that Radio Shack is selling a 25 Watt 10 meter rig, who will design an amplifier for it using parts scrounged from an old TV? ■

CDF-VIP NEWS

"ADOBE" MOCK FIRE CAMP

About 100 firefighters from San Francisco to Sea Ranch learned about how large incidents are organized in a mock fire camp sponsored by the Sonoma-Marin Fire Training Officers' Assn May 6. CDF provided training on fighting wildland fires as well as their most important contribution -- the field kitchen!

All communications were provided by the VIP's. Besides manning the Communications Van (generously loaned by the Sonoma Police Dept and Valley of the Moon ARC), we covered each Section and Operations Division and provided a "shadow" for each of the Section Chiefs, just as we would in a real incident.

At the "helispot", the local firefighters would fill the bucket from a firehose, then the 'copter would do a drop so they could get an idea of the area covered. I was most impressed with the skill of the CDF pilot. It turns out he is a ham (N6CYA). They had a 450 MHz ATV rig and camera mounted in the nose of the helicopter so the folks in the Comm. Van could get a bird's-eye view of the base camp. After the last demonstration of the day, N1AL and WB6VGY got a free ride.

Hams who helped out were: Al N1AL, Hoppy WD6CKP, Chuck N6DDK, Mike N1DJE, Hank W6DTV, Jack KJ6EC, Gerald WD6EVL, Sarah N6FAX, Mike W6FCQ, Bob K6GEV, Spence WA6IXC, Kermit W6JFN, Rudy N6KLU, Floyd K6KQJ, Ed K6OFR, Garry N6ONZ, Jim N6PTM, Jud N6QAV, Marie KI6QY, Rich N6RXA, Don N6SRH, John W6TLK, Jack N6UYB, and Fritz WB6VGY.

Two "strike teams" parked while their owners attend firefighting seminars.

Floyd K6KQJ at the Comm. Van packet station.

Jack N6UYB helps set up the weather fax.

ALINCO MOD'S

I am looking for the modifications that give the Alinco ALR-22T extended receive/transmit capabilities. If you know what the mod is, or where I can get the information, I sure would like to hear from you. You can leave me E-mail on the bulletin board "JAKBB" on 144.910 on Sonoma County, or mail it to:

Garry Palmer N6ONZ, 333 E. Robles Ave., Santa Rosa, CA 95407 or call (707) 584-3425.

I will reimburse you for any cost involved. Thanks and 73.....

RENEW YOUR ARRL MEMBERSHIP THROUGH THE CLUB AND THE CLUB GETS TO KEEP \$2 (no expense to you). Make out your check to SCRA, and send it with your ARRL renewal form to SCRA, PO Box 116, Santa Rosa, CA 95402 or give it to the Treasurer.

Now that HSC is no longer running a full-page ad every issue, we could use someone to look into drumming up some more ads for *Short Skip*. Call Al, NIAL (see p2).

HINTS FOR CONDUCTING A NEWSPAPER COLUMN

BY JOE PHILLIPS K8QOE

For the last 3 years, Joe has been conductor of the *Cincinnati Enquirer's*, "Ham Call" column, which has been well-received by the newspaper's editors as well as the readership. Joe offers the following tips for present or would-be columnists:

A local ham radio colmn is (a) a service to members of the hobby, (b) a public relations tool, and (c) a recruitment tool for gaining new interest in the hobby by non-hams.

Keep your information local in nature. Only spotlight national news occasionally -- there are enough national magazine outlets. This hobby has enough local personalities for a local columnist to work with.

Get two-way communication where possible. It makes hams feel personally involved in the column, and the newspaper has tangible evidence that you have an audience. The ham community isn't big enough to affect reader-ship surveys, buy mail helps keep your news-paper interested in continuing the column. In *Cincinnati*, we ask those needing a 610 form to write us for a copy, and this has been a first-class winner. We ask clubs to send us information, requests for stories, newsletters, etc. Anything to generate mail.

Keep your columns as humorous as possible. Avoid "preaching" of any type.

Be accurate at all times. Use as many names and calls as you can. People still like to see their names in the paper. Support all local clubs (not just your club). Report meetings, test dates, classes and other activities. Support the idea of joining a club, and be active in yours as an example.

Keep away from long features. Today's newspaper reader does not have the time.

Several short items (variety, of course) makes more sense than one long item.

Technical stories have very limited appeal. Avoid them. Also avoid jargon unless you give a brief explanation of each term used.

Keep away from your personal experience. Concentrate on other's experiences. No one really cares about your ham shack -- everyone has his or her own.

Tnx ARRL *Field Forum*

MOST ASSIDUOUS RADIO HAM

Richard C. Spenceley KV4AA (D July 30, 1982) of St. Thomas, US Virgin Islands, built his contacts (QSO's) to a record level of 48,100 in 365 days in 1978. Tnx *Guinness Book of Records* and Aaron KA7YXF.
