ARE YOU NOT AN SCRA MEMBER?

If so, then this is a complimentary copy. Our club is involved with almost every area of Amateur Radio: Repeaters (13/73), Field Day, license classes (Novice through Extra), volunteer exams, RACES, DX programs, packet radio, hidden xmtr hunts -- you name it.

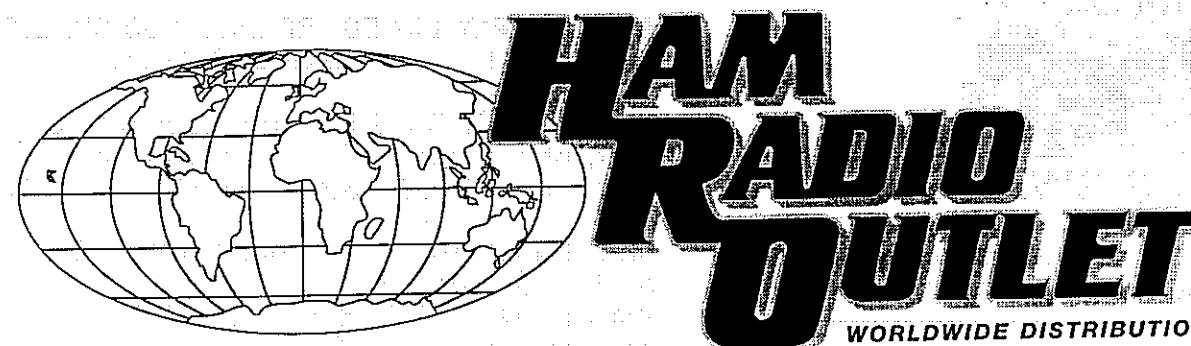

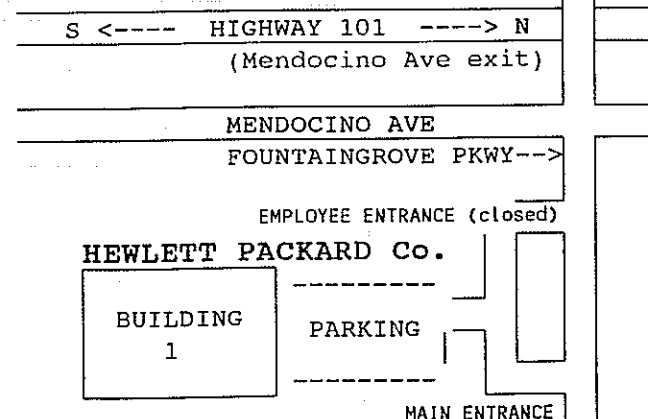

We invite you to attend our next monthly meeting (see below) or check into the Tuesday night SCARS net on the 146.13/73 repeater at 7PM. You will hear the latest Amateur Radio Newline broadcasts, announcements of SCRA activities and a Swap Shop. If you would like to join SCRA, please refer to the dues listed below. Hope we can have an "eyeball" QSO with you at the next meeting! 73 ...

Club Meetings:

7:30 PM, 1st Wednesday each month at the Hewlett Packard plant in Santa Rosa. Anyone interested in Amateur Radio is welcome.

NEXT MEETING: June 3, 1992
 Program: Field Day 1992

DUES: \$12 per year, plus a one-time \$4.00 initiation fee. Dues are pro-rated \$1/month for new members who get an SCRA call/name badge. Family memberships are \$18 per year.

We're Organized!

As everybody should know by now, Field Day is the weekend of June 27/28. The site: the Radioman School at the Two Rock Coast Guard base (talk-in on 146.73). We will have a picnic dinner Saturday night at 5 PM for all SCRA members and guests. Price is \$6 for steak, salad, chili w/beans, french bread and beverages. Even if you don't care to operate, come out and see what everyone is up to and soak up some fellowship.

We plan 7 transmitters this year: 2 CW, 2 phone, 1 packet, and 2 novice (CW and phone). We held a Field Day planning meeting on May 21 to decide on antennas and equipment. We still need a couple RV's or trailers to use for operating positions. (Tents get mighty cold at night out near the coast.) See N6PTM if you can help.

The club will sponsor a breakfast for operators and helpers on Sunday morning. We'll have ham, scrambled eggs, hot rolls and coffee.

TO SIGN UP:

If you would like to operate, or help out in other ways, here are the people to contact:

KK6XT will be CW manager, N6PTM phone manager, WB6FRZ Novice manager, and K6ZWB/N6VUC site managers. KC6PJW will handle the packet station and bonus points (solar power contacts, traffic handling, etc.) KK6WN, KK6VY and KC6UXM will prepare the food. KC6WTE is the Public Relations manager, and K6ZWB and N6VUC will head the setup/takedown committee.

CONDUCT ON THE BASE:

The Coast Guard was kind enough to allow us use of their facilities, subject to the following rules:

We may start setting up at 1600 Friday June 26, and should be out by 1400 Sunday June 28. We are not to extend any antennas or other equipment, park any vehicles, or allow people to enter the areas beyond the maintained grounds surrounding the building. Other than for operating positions, park only on the paved parking areas. Allow room for emergency vehicles to pass.

Strictly obey all posted speed limits. As a military facility, vehicles are subject to search at any time. At night, we must use the main gate on Tomales Rd. We are authorized to use the Mini-Mart and Deli on the base. Our Coast Guard liaison is Lt. John Zantek WX3K.

We must protect the following Coast Guard frequencies from interference (MHz): 7.375*, 9.076, 11.0295*, 46.120, 46.280, 151.460, 154.025, 154.175, 154.280, 154.310, 155.100, 155.355, 155.835, 162.225, 164.300, 165.337, 175.237, 10525.0.

We should avoid the following frequencies to prevent harmonics falling on the above starred (*) channels: 3.688 and 3.677 MHz. This should not be a problem for the main CW stations as there is little contest activity above 3650 kHz. *I suggest the Novice operators stay in the top half of the 80 meter novice band (above 3700 kHz).*

International Marconi Day

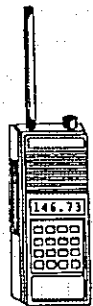

By John Wallack W6TLK

W6TLK/IMD represented the Marshall Calif. Marconi receiving station for International Marconi Day, April 25, 1992. W6TLK/IMD was one of twenty stations throughout the world taking part in this special event.

1913 Marshall Station History

The Marshall station was built by the Marconi Wireless Company in 1913 to establish communications between the west coast and the Hawaiian Islands. Service began on September 24, 1913 with callsign KET. This made instant communications possible between California and Hawaii, as well as Japan, Europe and South America. The associated transmitter was located in Bolinas, Calif. The station used spark gap transmitters and an antenna six miles long!

In 1917 the Marshall station was taken over by the U.S. Navy and given callsign NWO. After World War I, the station was returned to the Marconi Company and again became KET. The Marconi Company was sold to RCA on March 27, 1920. The Marshall station provided ship-to-shore communications covering the Pacific ocean which made ocean travel much safer. Under RCA, the marine service maintained the Marshall station until 1939.

SCRAPS: SCRA Public Service

By Kathy Mahan KC6UXJ

Fast and Furious

were key words for Public Service events in April. With only 3 days notice, SCRA members came to the rescue for two unscheduled events on April 25, the Special Olympics and the March of Dimes Walk America.

Many thanks to those people who were so willing to volunteer at the last minute for the Sonoma County Special Olympics held at the Santa Rosa Junior College: Connie N6FYV, Nadine KC6WUI, Don N6DPE (hope we didn't get you up too early, Don) and Jack N6UYB. Directly across the field from the Special Olympics, approximately 400 people participated in a 10-mile walk for the March of Dimes. The hams who came to the rescue for this event were: Hank W6DTV, Sarah N6FAX, Ken N6GXI, Georgia N6GZU, Kelly KD6CJQ, James KD6GSF (who will be a pro at the age of 9), Wike KD6FBN and Kathy KC6UXJ.

"100 Bottles of Wine" ???

The SCRA hams are just having too much fun, because on May 2nd, 21 more people volunteered to help with communications for the annual "Wine Country Century." Due to the heat and length of the event, it kept everyone busy from 6:30 AM to 6 PM.

Many thanks to the following people and especially to those who worked more than their scheduled time: R. L. Caron KK6GP, Marie KI6QY, Bob N6RMW, Betty AG6C, Phil N6OOA, Bill N6GHG, Georgia N6GZU, Frank N6LAJ, Phil N6KZS, Hoppy WD6CKP, Doug KC6RHA, Clarence W6IZR, Cal KI6NY, Judy KD6GSY, Ken N6GXI, Gary KC6WTE, Rudy N6KLU, Wilbur N6MGY, Rick N6RXA and Kathy KC6UXJ. Special thanks to Richard KC6RDH for working the entire event.

On the same day as the Wine Country Century, another fellow ham was helping out at Two Rock with the Marin Radio Amateur Club for the American Diabetes Assn. bike ride. Thanks to Bill KD6IJU.

UPCOMING EVENTS:

June 7 Vineman Int'l Mineature
June 13 American endurance (equestrian) ride
June 14 Coddington Lions Biathalon
June 20 The famous "Terrible Two"

If you are interested in volunteering for any of these events, please contact Kathy KC6UXJ at 823-4980 (eves) or 433-2758 (days).

Public Service is an excellent vehicle for you new hams to meet other radio amateurs, enhance your communication skills, and share in the fun. ■

than I am, which means I have to tell him the call sign. I can keep my concentration much better doing everything myself.

- Please write legibly. Any contacts we can't make out must be deleted.
- Use pen only. Pencils get dull and smudge.
- Don't write over letters. If you make a mistake, cross it out and start over.
- Keep a "dupe sheet". Illegible Callsigns in the log are often legible on the dupe sheet.

Don't forget to sign the log and indicate which contacts are yours. This is an FCC requirement, and helps us know whom to give credit to in the *Short Skip* article.

DUPE SHEETS:

The duplicate-QSO check-sheet is a list of all call signs worked on that band, arranged in order so you can quickly see if a station has already been worked. The sheet is divided into 11 sections, one for each US call area and DX. Each section is divided into 26 blocks, one for each letter of the alphabet. Call signs are sorted by SUFFIX, not prefix. For example, "N1AL" goes in the "1" section, "A" block (not the "N" block). Enter COMPLETE CALLSIGNS, not just the suffixes. Don't try to sort calls into alphabetical order within blocks -- just write 'em down as they come.

Last year, there was one section of the 20 meter log where the operator did not use the dupe sheet. Of 57 QSO's, 14 couldn't be counted because they were duplicates or illegible. This also caused at least 4 later duplicates by another operator. 57 QSO's in 2 hours, 20 minutes would have been a fair rate, but 39 QSO's doesn't look as good.

1992 FIELD DAY:

Field Day is at the Two Rock Coast Guard base (see map). Antenna set-up is Friday afternoon/evening (June 26) starting at 4 PM. The operating period is from 11 AM Saturday June 27 to 11 AM Sunday June 28. Come to the June club meeting for more details.

We plan to have two Novice/Technician stations again this year; everybody who wants to operate should have the opportunity. Don't be intimidated if you are new at this — everybody once had to do it for the first time, and mistakes are not grounds for capital punishment! CQ FD CQ FD CQ FD ... ■

Field Day Operating

by Alan Bloom N1AL

Field Day is different things to different people. It's a picnic. It's a campout. It's a social occasion. It's an emergency exercise. And finally, it's a contest.

The object of a contest is to contact as many stations as possible in a set period of time. For Field Day, this is the 24 hours between 11 AM Saturday and 11 AM Sunday. There are no extra points for contacting rare stations: For FD, a California contact counts the same as one from Tahiti. Phone QSO's count 1 point each, CW contacts count 2.

You can work the same station once on each band. CW and phone count as separate bands. Our novice station, WA6XXX, is considered separately. So, for example, we can work the same station 3 times on 40 meters -- Once on CW and once on phone signing W6LFJ, and once in the Novice bands signing the novice call.

THE EXCHANGE:

A valid contact consists of an exchange of call signs and "the exchange." For Field Day, the exchange is the entry class and the ARRL section. Our class is 5A (5 transmitters, club station), and the section is SF (San Francisco).

CALL CQ:

There are two ways of making contacts on Field Day -- calling CQ or answering other stations' CQ's. Calling CQ is easier, since you don't have to be bothered tuning the radio, so it's a good method for for inexperienced op's.

The first key to success in calling CQ is to find a good spot. You want to be down near the bottom of the band segment where all the action is, so people can find you. You also want to find a spot that is clear of interference. Unfortunately, these two requirements are contradictory, so you just have to find the best compromise. On the higher bands, there may be a loud station on frequency that you can't hear because of the skip zone. If you aren't having much success and you can hear a lot of stations going back to someone you can't hear, you might consider moving to a less-congested spot.

How long should the CQ be? And how long do you wait for a reply before giving up and calling CQ again? You'll learn this from experience. When things are slow, you might give a fairly long CQ: "CQ Field Day, CQ Field Day, this is W6LFJ Whiskey Six Lima Foxtrot Juliet, go ahead" and wait several seconds for a reply. When you have a good "run" going, you want to waste as little time as possible: "CQ Field Day, W6LFJ" <other station's reply> "W1XYZ 5 Alpha, San Francisco" <his exchange> "Roger, QRZ W6LFJ" etc.

HUNT & POUNCE:

Unless you are running a kilowatt into a big antenna, you'll usually get a higher QSO/hour rate by answering other stations' CQ's. The technique is to start at one end of the band (I start at the low end, but it doesn't matter) and slowly tune up the band looking for CQ's. Take the time to try to copy EVERY station you hear -- don't skip over crowded areas figuring you'll catch them on the next sweep.

Pay attention to propagation. It may not be worthwhile to call weak east coast stations in early evening when atmospheric absorption is still high here on the west coast.

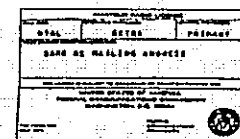

To save time, log the other station's call sign as soon as he starts to reply. Enter the exchange as he sends it (don't recopy). Start tuning as soon as he QSL's (no need to listen to his next CQ.) You can fill out the dupe sheet while tuning for the next contact.

If a station comes back to someone else, it is usually worthwhile waiting to call him again, rather than tuning for another station. But if he doesn't reply even though nobody else was calling, don't waste your time. Remember, there are no extra points for "rare" ones.

If things get slow, you might flip the receiver bandswitch and check out another band. But don't flitter from band to band -- you lose precious minutes every time you do this.

LOGGING:

Most FD stations use two people per station: an operator and a logger. The logger fills out the log and dupe sheets. However, I like to do my own logging. During a contest, there almost always are several stations in the passband of the receiver at one time. The logger often is listening to a different station

VEC Exam

by Steve Lund WA8LLY

WHEN: June 2, 1992 (Tuesday)
Written exams: 7:15 PM
Code exams: 7:15 PM

WHERE: Emergency Operations Center (EOC)

600 Administration Drive, Room 108C, Santa Rosa, CA 95403. This is next to the Sheriff's Office at the County Administration Center. The EOC is directly across from the new jail. The exams are given in the same room previously used for SCRA meetings. Talk-in frequency is 146.73 MHz.

PRE-REGISTRATION DEADLINE: None, walk-in only.

DETAILS: All exam levels, Novice through Extra. There is no fee for the Novice exam. The fee for other exams is \$5.40.

ON EXAM DAY bring the following:

- Your ORIGINAL *signed* license and a photocopy of it
- Your ORIGINAL CSCE, if you have one.
- A photo ID (Calif drivers license preferred)
- 2 pencils (soft lead type)
- Pen
- Calculator (optional) If programmable, the memory must be erased.
- A check for \$5.40 made out to ARRL-VEC (please, no cash)

If you are taking a CW exam and have a favorite set of headphones with 1/4-inch plug (stereo OK), please bring them. Otherwise, you must copy the code from a speaker, and the room acoustics are poor.

The VE contact person is:

Steve Lund WA8LLY
10180 Mill Station Rd.
Sebastopol, CA 95472-9655
(707) 823-4544 (after 7:30 PM)

RENEW YOUR ARRL MEMBERSHIP THROUGH THE CLUB AND THE CLUB GETS TO KEEP \$2 (no expense to you). Make out your check to SCRA, and send it with your ARRL renewal form to SCRA, PO Box 116, Santa Rosa, CA. ■

Field Day Meeting - Novice and Technician Station(s)

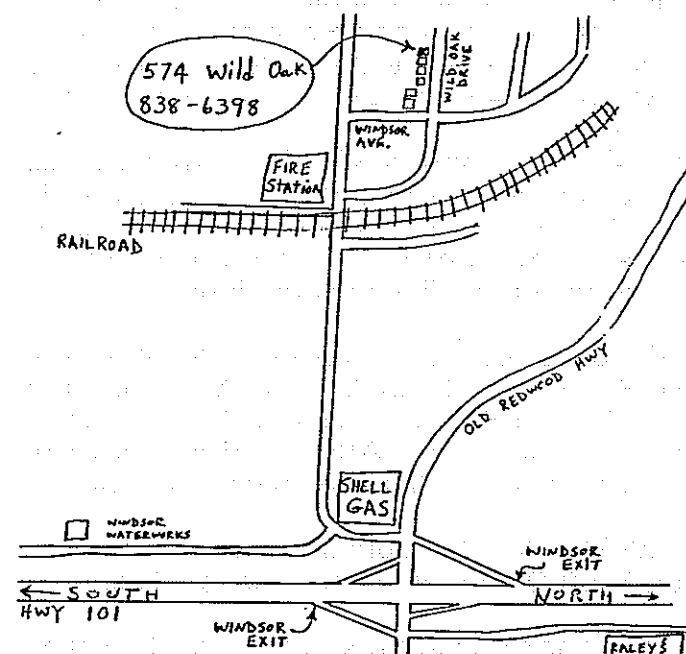

by John Breckenridge WB6FRZ

Field day is fast approaching (June 27-28), and we need to have a major planning meeting to organize the Novice/Technician effort.

All participants in the Novice/Technician station(s) for the Field Day event please meet at my house in Windsor on Saturday, June 6 at 1:00 PM. In a nutshell, we need to discuss the following:

1. When and where the event will happen.
2. How many Novices/Technicians will be participating.
3. How many stations we need.
4. What bands and modes we will use.
5. What equipment, shelter, tools, etc. we need and who will bring what.
6. What the physical layout of stations and antennas will look like.
7. What call sign will be used.
8. How to make and log contacts.
9. My role in the contest.
10. Notes from last Field Day's experiences.
11. Anything else you can think of.

Please start thinking about the equipment and other items you have available and write them down before the meeting. ■

SCRA MINUTES

May 6, 1992

The meeting was called to order by President Merlyn Pfeiff N6VUC at 7:32 PM. Other present: Vice President Rick Reiner K6ZWB, Secretary Al Bloom N1AL, Treasurer John Gauger KK6XT, Activities Chairman Jim Pelmulder N6PTM, Repeater Chairman Jim Rutherford WB6PER, and Members-at-Large Bill Splaine N6GHG and Gary Gouger KC6WTE.

VISITORS: Shelly KD6AFZ introduced 10 visitors.

UPGRADES & NEW CALLS since last month include Jerry KD6HYC, KC6PJW to General (and wife to Novice), KC6WTE to General, KC7VS to Extra, WA6SEU to Extra and KC6UXI to General.

The MINUTES were approved as published in last month's *Short Skip*. m/s N6KZS/KC6PJW

The TREASURERS REPORT was also so approved. m/s WX3K/W6TLK

ATTENDANCE tonight was 80, down from last month. (Summer slump starting?)

PUBLIC SERVICE: Kathy KC6UXJ went over 4 events worked in April, including the March of Dimes WalkAmerica and Special Olympics on the same day, and the Wine Country Century last Saturday. 4 more events are up in June.

EDUCATION: John WB6FRZ's Novice class has two more sessions to go. The exam is May 22. Jeff KC6VS's General class has 4 more evenings before his students will be ready to take the VE exams on June 2.

ARRL: SF Section Manager John Wallack W6TLK presented our Special Service Club renewal. The Pacific Division Convention is October in Concord. ARES in Humboldt Co. performed very well in the recent earthquake.

The W6TLK/IMD Marconi special event station made 1200 QSO's with continuous pileups.

WX3K's packet system still has its HF port at Two Rock, but the 2 meter gear has returned

to Rohnert Park. We will soon go to a 9600 baud backbone, and maybe later to 56 kbaud from Sonoma Mountain to San Jose. The WX3K BBS has reports on emergency activity in the earthquakes.)

K6ZWB just finished reading *200 Meters and Down*, Clinton B. Desoto's excellent history of Amateur Radio. Rick will pass it along: as each member reads it, s/he should sign it and pass it along.

CDF/VIP will participate in MAD, a Multi-Agency Drill this Saturday May 9 in Healdsburg, according to K6GEV.

ARMED FORCES DAY is on May 16. WX3K says the Coast Guard base will have open house, and we are invited.

W6DTV notes that the Valley of the Moon gave 56 VE tests at their session last week. Hank also described the abortive balloon ATV launch recently. Also, members should remember to clean up the meeting room before we leave.

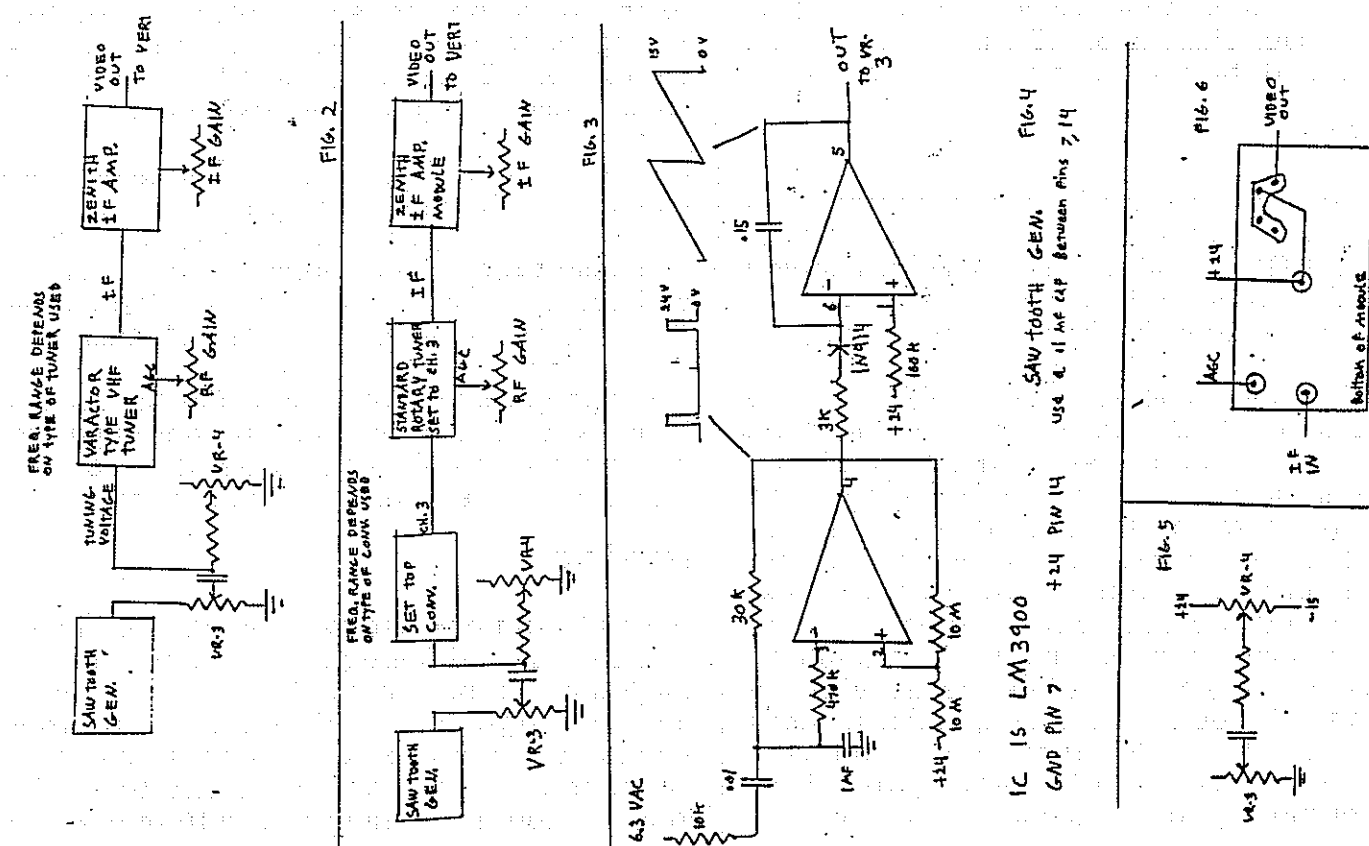

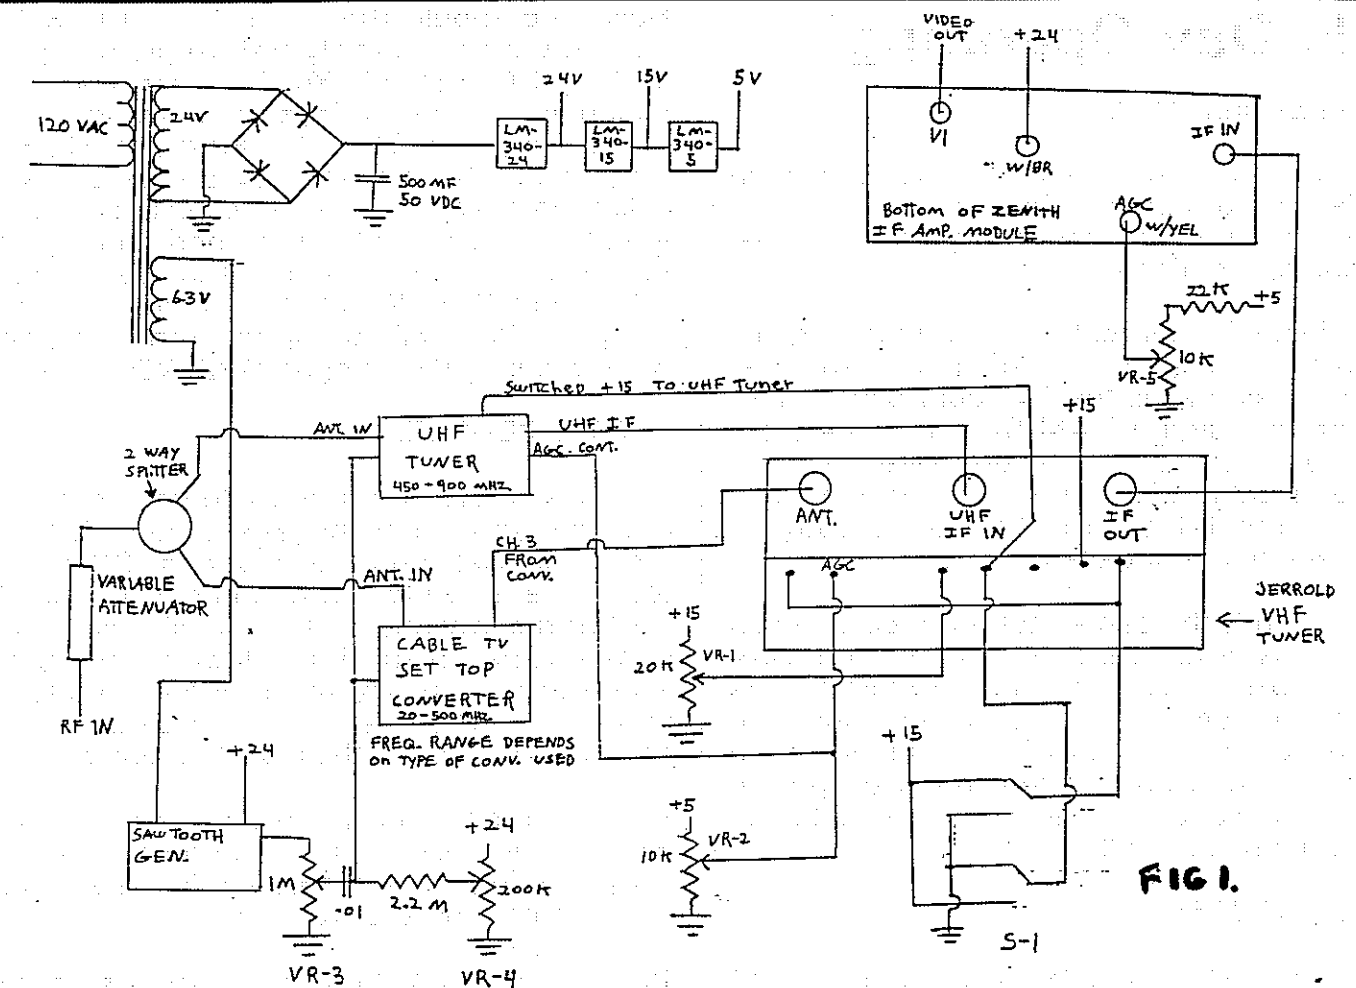

CLASSES: KC7VS asked how many would be interested in Technician, General, Advanced or Extra classes. The Extra got the most interest.

The **PROGRAM** was a short talk by County OES Director Dan Nicholas. We were shown a video of a recent TV-50 "Sonoma County in the 90's" program. In an interview, Mr. Nicholas highly praised Amateur Radio. He stated that he doesn't know why we are called "amateurs" as we preform a service the County could not do without. As part of the TV program, outgoing Chief RACES Radio Officer Jim Rutherford WB6PER gave a tour of the new comm trailer.

Mr. Nicholas thanked Jim for his 6 years of enthusiastic service as RO. He mentioned that Jim recently was honored a gold resolution by the County Board of Supervisors. He then presented Jim with a burl clock/plaque as a token of appreciation.

Jim noted that one word best characterizes the last 6 years: "Support" — from the members and from the OES. And especially from his wife Susan N6IRJ.

The member lottery was won by Bill WD6DXW.
Meeting adj. 9:13 PM. m/s N6GHG/KA6CRG
Respectfully submitted Al Bloom N1AL, Sec. ■

20-900 MHz Spectrum Analyzer

by Phil Gaul KC6BSI

The VHF and UHF tuners in Fig 1 are out of a Jerrold TV remote control, model TRC-82-4. These are standard electronic (varactor) tuners found in many TV's. In a varactor tuner, the frequency can be changed by varying the tuning, or control, voltage. I used a cable TV-type converter because it tunes continuously from 20-550 MHz with no bandswitching.

Converters can be easily found at flea markets. Most varactor tuners should work, with frequency range depending on type of tuner used. Some tuners have a large bypass capacitor on the tuning voltage input which will have to be removed. No matter what tuner you use, the basic plan will be the same -- a sawtooth generator sweeps the varactor tuner through its range, and the IF output from the tuner feeds the IF amp.

The IF amp module measures about 6" by 3". It is from a Zenith TV chassis #25DC56, and is used in may older color sets. Most IF modules should work as long as you can narrow the bandwidth and control the IF AGC voltage. The IF amp must have a video detector, since the video output is fed to the oscilloscope vertical input. You may need to reverse the video detector diode to get the correct polarity. I have had good luck with old Zenith modules. Some Zenith IF amps will have a layout like in Fig 6.

IF bandwidth is critical for proper operation of the analyzer. Bandwidth should be as narrow as possible, around 300 kHz. To adjust the IF amp, connect the analyzer to an antenna or cable TV system, and adjust each coil for the narrowest response with highest amplitude.

However, tuning alone is not enough -- I have found that poor or even no RF grounding or shielding of the IF input connector will narrow the bandwidth. If the module is to be located inside a metal chassis, mount it on plastic spacers. Power, ground and AGC connections should be made through choke coils. A better way to deal with this problem is to use some sort of bandpass filter that will work within the 42-45 MHz IF frequency. I have not been able to find one around here yet.

A sawtooth generator must be built (Fig 4), but it is easy to make and uses common parts. It is used to sweep the varactor tuners through their frequency ranges and to trigger the horizontal sweep on the oscilloscope. The pulse signal on pin 4, or the ramp signal on pin 5 can be used for triggering. Connect the output on pin 5 to the scope horizontal input. The only purpose for the 6.3 VAC is to line lock the generator to 60 Hz. You may need to vary the 470K resistor a little to get it to lock.

The power supply is very basic. It uses LM340-type 24V, 15V and 5V regulators.

The RF is fed through a variable attenuator to a 2-way splitter, then to the inputs of the UHF tuner and the cable converter.

The bandswitch, S-1, is shown in the VHF position. The RF gain, VR-2, controls the AGC voltage on the Jerrold UHF and VHF tuners. VR-3 is a sweep width control. It determines the spectrum width or range you want to see. VR-4 is the center frequency control. It sets the center of the frequency range. VR-5 controls the gain of the IF amp.

Some tuners and converters will need a negative tuning voltage to go as low as 20 MHz (Fig 5). Normally tuners will only go as low as 40 MHz with zero tuning voltage.

A simpler way to do this if you don't want UHF is to get an old cable TV set-top converter that has varactor tuning and connect a standard rotary TV tuner to the converter's output as in Fig 3. If you have a varactor or electronic VHF tuner, then follow Fig 2. Some tuners need a negative supply voltage. These also require a negative voltage on VF-4.

The analyzer can be built small enough to fit inside some of the older oscilloscopes. I used an RCA WO-91A.
